SIDE-EVENT

ADDRESSING HUMAN MOBILITY AND DISPLACEMENT IN NATIONAL DRR STRATEGIES

Asia Pacific is among the regions most affected by disasters and the adverse effects of climate change. Disasters caused by natural hazards affect people and communities across Asia and the Pacific, including through temporary or permanent displacement.

This side-event will discuss key opportunities for the inclusion of disaster displacement considerations into national DRR strategies by 2020 (Target E). Governmental stakeholders will present effective practices on how to prevent and address disaster displacement, in the implementation of the Sendai Framework, the Nansen Initiative Protection Agenda and the Words into Action guidelines on disaster displacement.

PLATFORM ON DISASTER DISPLACEMENT
