# **GRASSROOTS, LOCAL AND NATIONAL ACTORS: PARTNERSHIP AND COORDINATION ON DISPLACEMENT AND LOSS AND DAMAGE IN KENYA**

Climate change is driving major displacement in Kenya. According to the Internal Displacement Monitoring Centre (IDMC), over 1 million people have been displaced by disasters in the past decade.

Join this conversation moderated by Platform on Disaster Displacement's Head of Secretariat Atle Solberg at COP29 on showcasing ongoing collaborations across sectors and levels of government and society on the intersection between climate change, population displacement and loss & damage in Kenya, along with discussing outstanding needs and opportunities to strengthen existing responses.
